PROFESSIONAL PROFILE

Ex-Microsoft Data Science Leader & Strategist specializing in deploying ML solutions that drive measurable business outcomes and mitigate high-stakes regulatory risk. Over 15 years of experience bridging technical execution and executive strategy, resulting in \$20M+ in verifiable impact across Security, Risk, and Compliance domains. Expertise includes quantitative forecasting, ML governance, and full lifecycle strategic program delivery.

CORE TECHNICAL COMPETENCIES

ML/STATISTICAL MODELING: Classification/Recommendation Engines | Quantitative Forecasting | Time Series Analysis | Monte Carlo Simulation | A/B Testing | Causal Inference

MLOPS/TOOLS: Python (Scikit-learn, TensorFlow) | SQL (Advanced) | CatBoost | SHAP | MLOps Principles | Git | Azure/Cloud

STRATEGY/GOVERNANCE: AI Governance | Regulatory Compliance (GDPR, EUDB) | Strategic Program Delivery | Risk Management | Stakeholder Management | Prosci® Change Management

PROFESSIONAL EXPERIENCE

Principal Data Science Consultant, Investment Strategy

AMA Key Beacon LLC, Kirkland, WA

12/ 2023 – Present

- Architected and validated a Production-ready predictive model (classification/recommendation engine) to score commercial asset acquisitions, resulting in a 22% improvement in identified risk-adjusted returns.
- Designed and executed A/B testing/causal inference experiments (e.g., renovation pricing, tenant mix) on asset performance data, directly maximizing Net Operating Income (NOI) and optimizing investor ROI.
- Established ETL pipelines and custom ML monitoring dashboards (KPIs: Occupancy, DSCR) for \$10M+ AUM, enabling real-time cohort and sensitivity analysis to drive strategic decision iteration.
- Managed end-to-end stakeholder communication, translating complex financial model outputs and operational data into clear, risk-aligned narratives and visualizations for executive alignment.
- Developed and maintained robust Python/SQL ETL workflows to ingest and cleanse external market data, enabling rapid Monte Carlo simulations and downside risk modeling across various economic scenarios.

Portfolio Program Manager at Microsoft

Prime 8 Consulting, Bellevue, WA

04/ 2024 – 12/2025

- Automated executive-level portfolio reporting via Python/SQL scripting, establishing near-real-time data pipelines that improved reporting efficiency by 25% and accelerated key initiative decision cycles.
- Developed a data-driven project prioritization model by mapping initiative risk scores to projected business outcomes, which increased overall project success rate by 15% and guaranteed alignment with corporate ML/AI governance objectives.
- Established portfolio management best practices that addressed ML/AI governance and compliance requirements (e.g., GDPR, CCPA), ensuring scalable adoption and auditability of models deployed within the portfolio.

Staff Technical Program Manager

QUALTRICS XM, Seattle, WA

08/ 2022 – 10/2023

- Led cross-functional Data Governance initiatives resulting in a 25% QoQ increase in the adoption of core data/ML platform features by ensuring data quality standards and model pipeline accessibility.
- Implemented OKR/KPI-driven planning models using quantitative data to optimize team allocation, reducing the quarterly prioritization cycle time by 10% and accelerating the path to ML model deployment and iteration.
- Drove engineering productivity by piloting and integrating AI/ML-driven automation tools (e.g., automated labeling, MLOps workflows) that eliminated manual data preparation overhead and accelerated core model delivery timelines.

Senior Technical Program Manager

MICROSOFT, Redmond, WA

08/2014 – 07/2022

- Architected the data-governance framework for global ML/AI deployments, saving \$20M+ in potential regulatory fines by ensuring enterprise-wide policy adherence to GDPR and EUDB requirements.
- Led the quantitative redesign of core business forecasting models (demand and capacity), boosting customer satisfaction by 20% through improved operational accuracy and data-driven resource allocation.
- Accelerated the deployment of a vendor compliance program by 2 weeks through the implementation of a structured, data-driven program management plan and quantitative execution risk modeling, showcasing MLOps-ready delivery capability.

EDUCATION

Master of Business Administration (MBA) Florida State University, Tallahassee, FL

Master of Science (MS) in Computer Systems, City University of Seattle, Bellevue, WA. Emphasis in Analytics

Bachelor of Science (BS) in Electrical Engineering Trine University (formerly Tri-State University), Angola, IN

CERTIFICATIONS

Data Science and Machine Learning Certificate

Certified Information Systems Auditor (CISA)

Certified Data Privacy Solutions Engineer (CDPSE)

Certification In Risk and Information Systems Control (CRISC)

PROFESSIONAL MEMBERSHIPS

Information Systems Audit and Control Associations (ISACA)

International Association of Privacy Professionals (IAPP)
